

“We now have our happy little girl back”

Amelia
AFTER

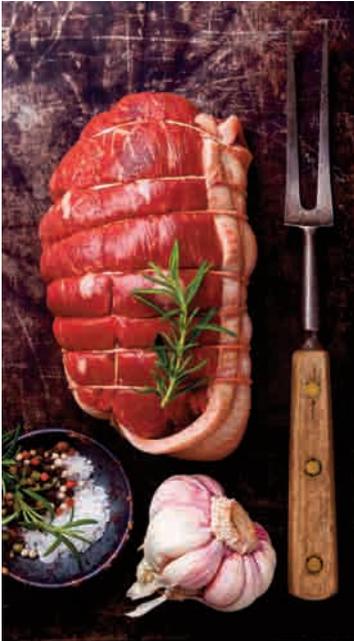

Before her parents discovered Lorisian, 9 year old Amelia had been suffering with constant congestion and a persistent cough which refused to clear, affecting her sleep and making it difficult for her to join in with sports and games at school.

Having ruled out any serious underlying conditions, Amelia’s GP recommended she try a Lorisian Food Intolerance test to see if it could reveal any hidden culprits in her diet which could be causing her to feel unwell.

The results of her test revealed reactions to cow’s milk, beef and oranges. Within a week of eliminating her trigger foods and replacing them with nutritious alternatives, Amelia’s congestion cleared, allowing her to sleep through the night, undisturbed by the coughing fits she previously experienced.

“ After eliminating cow’s milk, beef and orange she is no longer complaining about her chest and is now able to compete in Cross Country competitions at school without coughing and feeling poorly”

Talking about her daughter's experience, Amelia's Mum Amanda was delighted to have noticed great improvements to Amelia's health since optimising her daughter's diet:

"I would say that, having had Amelia's results back from her test, we now have our happy little girl back."

Taking the Test

Taking the test is straight forward, with no need to visit Lorisian's laboratory. The results will be with within 7-10 days. The Lorisian 150 plus test is a full diet analysis covering a wide variety of food and drink ingredients including:

- | Wheat, gluten, yeast, egg whites and egg yolk
- | Animal milks including cow, goat and sheep
- | 12 different grape varieties
- | Herbal teas including green tea and rooibos (red bush tea)
- | 25 different herbs and spices
- | A wide variety of meat and fish
- | And more than 100 other ingredients
